PROFESSIONAL SUMMARY

Senior Backend & Solutions Engineer with **10+ years of professional software development experience** designing, developing and improving business-critical software, SaaS platforms, financial applications and data-intensive systems.

Experienced in taking ownership of complex technical problems across the full software lifecycle — from architecture and implementation to production troubleshooting, data migration and long-term system improvement. Strong track record of resolving difficult data-integrity, performance and reliability issues at scale while delivering maintainable and well-tested solutions.

Progressed from software engineer to **Lead Developer**, combining hands-on development with technical decision-making, system design, mentoring and collaboration with business stakeholders.

Particularly interested in **software architecture, scalable data processing, automation and AI-powered engineering workflows**.

PROFESSIONAL EXPERIENCE

companyhouse.de — Senior PHP Solutions Engineer

2024 – Present | Germany / Remote

Large-scale business-data platform providing company, financial and ownership information.

- Own complex backend and data-processing functionality supporting **company relationships, historical data and data consistency** across the platform.
- Designed and implemented solutions for identifying and maintaining relationships between companies affected by mergers, splits, acquisitions and other legal transformations, including propagation of the resulting data across search and public-facing systems.
- Investigated and resolved **production-impacting failures**, including performance bottlenecks, N+1 queries, memory exhaustion, race conditions, timeouts and payment-processing issues.
- Migrated a caching layer from the database to **Elasticsearch**.
- Established a proactive production-error triage process, independently investigating 50+ production errors identified through log analysis and converting them into root-cause fixes.
- Introduced recurring technical-debt and **refactoring analysis**, shifting part of the team's work from reactive bug fixing toward proactive system improvement.

Devpark Sp. z o.o. — Backend Developer / Lead Developer

2017 – 2023 | Poznań, Poland

Software development company delivering SaaS, financial, commercial and ERP solutions.

- Developed and maintained backend systems for **SaaS, financial, commercial and ERP applications**.
- Took technical ownership of backend components and participated in system architecture and technical design decisions.
- Designed and implemented **REST APIs and integrations** between internal and external systems.
- Applied **SOLID, CQRS, TDD and established design patterns** to build maintainable and testable systems.
- Worked with relational databases and supporting infrastructure including MySQL, PostgreSQL, Redis, WebSockets and Docker.
- Collaborated with business stakeholders to translate requirements into practical technical solutions.
- Supported other developers through technical guidance, code reviews and architectural decisions.

Concepto SA — PHP Programmer

2015 – 2016 | Grodzisk Wielkopolski, Poland

- Developed web applications and business software using PHP, JavaScript, HTML5 and CSS.
- Built CMS functionality, landing pages and integrations with existing business and ERP systems.

Inter Groclin Auto SA — Electrical Engineer

2014 – 2015 | Grodzisk Wielkopolski, Poland

- Engineering and technical work in an industrial environment, including analysis, troubleshooting and technical problem solving.

HFC Systems — Network Inventory Specialist

2009 – 2013 | Poland

- Maintained and analyzed technical network inventory data for telecommunications infrastructure.

CORE COMPETENCIES

Software Engineering: Backend Development · Software Architecture · System Design · SaaS · API Design · Distributed Systems · Integration

Data & Reliability: Data Integrity · Data Processing · Entity Resolution · Data Migration · Performance Optimization · Production Debugging · Incident Analysis

Engineering Practices: TDD · Automated Testing · SOLID · CQRS · Design Patterns · Code Review · Refactoring · Technical Leadership

AI & Automation: AI-assisted Development · AI Coding Agents · AI Workflow Automation · LLM-based Applications · MCP

TECHNOLOGIES

Languages: PHP · SQL · TypeScript · JavaScript · Java · Python · HTML5

Backend/Frontend: Laravel · Yii2 · Spring · NestJS · REST APIs · Node.js · WebSockets · Vue · Angular · jQuery · Bootstrap

Databases & Data: PostgreSQL · MySQL · Elasticsearch · Redis

Tools: Git · Bitbucket · Jira · Xdebug · PhpStorm · Docker · Selenium · Linux

AI: ChatGPT · Claude · Amazon Q · Perplexity · MCP · AI Coding Agents

---

ADDITIONAL EXPERIENCE & INTERESTS

Collegium Da Vinci — Data Engineering & API Instructor

May–June 2026 | Poznań, Poland · 20 teaching hours

- Taught practical **data exploration and ETL/ELT concepts** in a hands-on laboratory environment.
- Delivered exercises covering **data extraction, transformation, loading and analysis** using AWS infrastructure.
- Guided students through implementation, data analysis and data visualization.

CERTIFICATION

Laravel Certification

EDUCATION

Poznań University of Technology
BSc, Electronics and Telecommunication Engineering · 2004 – 2009 · Poznań, Poland

LANGUAGES

English — Professional working proficiency

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
